

A photograph of a shipping yard filled with stacks of colorful intermodal containers (red, blue, green, yellow) and several trucks parked in the distance. The image is framed by a white, jagged, hexagonal cutout shape.

Milos • Agency Suite

Milos® Agency Suite is an advanced software solution tailored specifically for the needs of shipping agents, designed to support them in handling community customs procedures for import and export operations.

The standout feature of **Milos® Agency Suite** is its modular design, enabling agencies to implement only the modules they require. This flexibility not only ensures a **customized solution** but also helps control operational costs without compromising efficiency in managing shipping activities.

With **Milos® Agency Suite**, you can streamline your workflow through single data entry, reducing errors and eliminating redundant tasks.

The platform ensures that critical information is sent to customs systems, and the transmission outcomes are stored within the program, allowing users to continuously monitor the successful completion of procedures.

The main advantages of this solution are:

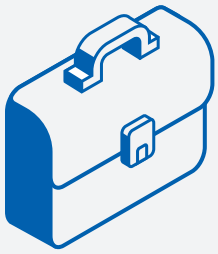

- *Enhance operations by minimizing errors and saving valuable time*
- *Ensure seamless integration and communication with Customs (ie. AIDA) and Port Authorities (Port Community System)*
- *Submission of TRAMAR statistics to the Ministry of Transport.*
- *Management of information related to containers, semi-trailers, and general cargo.*
- *Software designed for handling declarations both in free zone areas and traditional ports.*

MAIN SUCCESS CASE

A software designer for:

- Port agents for docking and unloading goods that allows simple and effective management of ship accounting, calculation of what is advanced by the port agent on behalf of the shipowner.
In the **ports of Genoa** the Digital Twin- which makes it possible to visualise and monitor the state of infrastructures over time- and other advanced simulation technologies can be used to plan and reschedule manoeuvring activities when unforeseen events occur.
- Freight forwarders and shipping agents. The software provides flexibility in operations, offering the possibility of acting as an agent for multiple companies in the same port.
